PREFACE

This book is designed to give the reader an overview of Georgia from a statistical perspective. Every effort has been made to publish the latest available data.

The Georgia State Data Center began publishing the Georgia Descriptions in Data series as an answer to the demand for an annual statistical publication covering a variety of subjects. Each edition contains some data that is routinely updated as well as data which is unique to that specific edition.

Georgia Descriptions in Data 1987 contains data on education, households, health and transportation. Georgia Descriptions in Data 1986 contains data on service industries, per capita personal income and population. Georgia Descriptions in Data 1985 focuses on education data for Georgia, but also contains information on retail sales, employment, income, government expenditures and public assistance. Georgia Descriptions in Data 1984 contains commuting data for Georgia counties, data on employment, agriculture, business and housing. Georgia Descriptions in Data 1982 and 1983 focus on population and housing data from the 1980 census.

It is our hope that this book offers frequently used data in a convenient format. Suggestions of new subject areas to include are welcomed. For this purpose, or for more information on a table, please contact Robin Kirkpatrick with the Division of Demographic and Statistical Services of the Office of Planning and Budget at (404) 656-0911 (or GIST 221-0911).

TABLE 2.

(1) Data for independent city school systems is combined with county systems. Enrollment for Atlanta city schools has been allocated to DeKalb and Fulton counties.
(2) Data is for Georgia residents only.
(3) The number of dropouts includes students who have left the Georgia public school system, whether it be due to death, military service, moving out of state, pregnancy, entering private school or dropping out of school entirely.

TABLE 3.

(1) The Criterion-Reference Test (CRT) is a measure of the basic reading and math skills considered by Georgia educators to be essential for further education. The test is administered to grades 1, 3, 6, 8 and 10 (the Basic Skills Test); with scores ranging from 100 to 300 for each subject. Scores cited in this table are combined reading and math.
(2) N/A indicates school system does not have high school.
(3) The state total includes 1.04% of teachers whose master's degree is in vocational education.

TABLE 6.

(1) Equivalent full-time enrollment is a conversion of the number of students enrolled, both full and part-time, to an equivalent number of full-time students. EFT is calculated by dividing total credit hours by 15, the load for a full-time student for a quarter. Due to this calculation, the sub-totals may be off because of rounding.

TABLE 8.

(1) The figure for high school graduates includes 836 graduates reported as "other" full-time students and 7,466 students who did not report in the follow-up survey.
(2) High School students enrolled in consolidated high school located in another school system.
(3) System did not report results of survey for 1985-86 school year. Figures given are for 1984-85 school year.

3. GEORGIA STATE DATA CENTER PROGRAM

The Georgia State Data Center Program is a cooperative arrangement between the U. S. Bureau of the Census and the Georgia Office of Planning and Budget. Additional participants in the Program are as follows:

The Georgia Department of Community Affairs
Emory University Library
Georgia State Health Planning Agency
University of Georgia Libraries, Data Services
Albany State College Library
Georgia Southern College Library
Georgia State University Library
Mercer Law School Library
University of Georgia Main Library
Georgia Institute of Technology Main Library
Georgia Area Planning and Development Commissions

The fundamental objectives of the Program are as follows:

1. Provide access to census data and assist local governments, planning commissions, and private businesses in utilizing the information.

2. Promote an even distribution of services to all areas of the State.

3. Expand the number of persons qualified to offer training and technical assistance to others on such subjects as what census statistics are available, how to read census tables and tape technical documentation, and approaches to effective use of the data.

4. Develop new methods for improving the distribution and utilization of data from the 1980 Census.

5. Increase user awareness of census products.
